StarMed Ventumask with Venturi flow driver & adjustable PEEP valve

StarMed Ventumask

StarMed Ventumask is a unique design for CPAP therapy that is simply activated by connecting to an appropriate oxygen supply. It can be used in a hospital environment or pre-hospital use, for example in an ambulance.

Advantages and Technical Features

- Ventumask is a complete and easy to use system, where the oxygen supply tubes, a Venturi flow driver and a PEEP valve are integral to the CPAP mask.
- The adjustable PEEP valve is designed exclusively for Ventumask and the administration to the patient is facilitated at some pre-settings: 5 - 7.5 - 10 - 12.5 cmH_2O
- The integrated Venturi flow driver can generate high patient flows while consuming a reduced amount of compressed oxygen
- O_2% can be adjusted from 40% to 100% at each PEEP level
- The user is guided by a performance table integral to the product, for independent PEEP and O_2% settings

Dual flow meter
